Problem **Part Nr.** GT-321

OK

Can the GT-321 run continuously if it is plugged into the charger?

Product AIR Products

Solution

This depends upon the Serial number of the unit. The earlier models had a different charging circuit where the charger was not powering the device, but was only charging the battery. On these units, continuous run was not possible. As of Serial number C1571, the charger circuit was changed so that the unit is actually running from the AC adapter.
