

# BT-645 Portable Dust Monitor

---

The **BT-645** Portable Dust Monitor has been designed to continuously measure and record particulate information for indoor work place and public place environments.

## Key Features:

- 'Real Time' monitoring
- Simple operation
- Rugged design
- Built-in Datalogger
- Purge air system
- Low power consumption

## Optical Sensor

A laser optical sensor is used to detect and measure particulate concentrations up to 100 milligrams per cubic meter. The continuous flow optical sensor is combined with purge air to ensure accurate measurements in adverse environments.

## Rugged Design

The optical sensor, matched electronics and backlit display, are enclosed in a rugged metal enclosure to protect the instrument from normal daily use.

## Data Storage

The internal datalogger will store over 5,000 samples. Sample history events can be viewed on the display or downloaded to a computer using Comet software.

## Battery Operation

The internal battery pack provides over 10 hours of continuous operation. Battery recharge time is approximately 2.5 hours.

## Optional Inlets

The standard unit is supplied with a TSP inlet. Optional sampling inlets are available for PM2.5, PM1 and PM10.

## Applications:

- Public and Workplace Monitoring
- Industrial / Occupational Hygiene
- Indoor Air Quality

Note: Not recommended for continuous outdoor use.
