

534 Wind Signal Converter

The 534 Wind Signal Converter adds convenient, easy to use 0-1 VDC signals (standard) or 0-5 VDC signals (optional) to standard Met One Instruments cupset anemometers and wind vane sensors.

SPECIFICATIONS

Input power	8-24 VDC
Wind Speed Range Wind	0-75 m/s
Direction Range Wind	0-360 degrees
Speed Output Wind	0-1 VDC (0-5 VDC option)
Direction Output	0-1 VDC (0-5 VDC option)
Connections	Internal Terminal Strip
Size	5" H x 4" W x 3" D.
Mounting	Pipe or mast mount using included clamps. Wall mount using screws (not included).

Compatible Wind Sensors

- 034B Wind speed and direction combination sensor
- 014 Wind speed sensor
- 024A Wind direction sensor
- 023 Heavy duty wind direction sensor
