

CAL-100

Gas Dilution Calibrator

The Met One Instruments CAL-100 performs gas dilution calibrations and is used in conjunction with regulatory traceable gases and a zero air generator.

The most cost effective solution, the CAL-100 allows the most up-to-date calibrations technology to be available to all.

Features

- Performs single and multi-point calibrations using the CAL-100 Calibrator's precision mass flow controllers, for utmost confidence in the results.
- Performs calibration manually through user interface or remotely via RS232, USB networks, or digital inputs.
- Designed and developed with wide-ranging customer input for easy, intuitive, accurate use.
