Met One Instruments

POWERED BY ACOEM

2026 Training Opportunities - Introducing Met One Academy

Met One Instruments Powered by Acoem is proud to produce some of the most widely used, robust, and reliable air quality monitoring equipment available, and we applaud and appreciate your interest in learning more about our technology. Starting in 2026, we are transforming our training offerings into the all-new Met One Academy. While we have always offered instruction, this new program represents a dedicated commitment to professional development. Join us at our headquarters in Grants Pass, Oregon, for a comprehensive hands-on learning experience. This is the definitive way to master Met One Instruments technology, taught directly by the experts who build it.

Training Format: The training sessions provided by our expert team are designed as in-person on-site trainings. An important aspect of these opportunities will be the hands-on demonstrations, which are most effective when experienced in-person. These sessions include informative presentations, engaging and interactive demonstration opportunities, maintenance procedure details, with question-and-answer sessions available throughout to ensure all audience-specific topics of interest are addressed.

We have set a schedule for three (3) Met One Academy sessions conveniently spaced throughout 2026. Topics and focus instrumentation are also separated by day, and we offer ala-carte options if you are interested in only one or two of the days' topics. A Certificate of Completion will be supplied to each attendee upon successful completion of the full 3-day training. (We can provide a certificate unique to each attendee to describe the instruments they received training on.)

Regular breaks are scheduled throughout each day of training, and lunch is provided daily as part of the training fees. **Travel and accommodation are not included and will need to be scheduled in advance by each attendee.** (For accommodation recommendations, **CLICK HERE** or visit: https://metone.com/VisitGrantsPass)

2026 Training Schedule	Training Fees (per attendee)
• **April 14-17, 2026** • **June 14-17, 2026** • **October 13-16, 2026**	• 3-Day Schedule (Tuesday – Thursday): **$2,100** • Additional Day (Friday): **$800** • Ala-Carte Cost Per-Day: **$800**

Daily Schedule: 8am – 5pm	Instrumentation Focus
Tuesday	OPX 1025: Theoretical and hands-on instruction
Wednesday	BAM 1020 – theory of operation and maintenance overview, plus in-depth hands-on training & advanced troubleshooting
Thursday	BAM 1022, BAM 1022 PLUS, and/or E-BAM Plus (based on audience interest/preference)
Friday (optional)	Audience Choice – specified by session attendees (typically E-Sampler, E-BAM, E-FRM-DC, and/or E-SEQ-FRM)

Training Location: Our trainings are strictly in-person, at our company headquarters located at:

Met One Instruments Powered by Acoem
200 NE Greenfield Dr.
Grants Pass, OR 97526
(541) 471-7111

Training Registration: We encourage you to register for your 2026 training(s) as early as possible, as space will be limited, and we expect the three scheduled training opportunities to fill to capacity. **To secure your registration for each attendee, please ensure that we receive full payment (Credit Card, Check, or ACH) no less than two weeks prior to the first day of training.**

To register for training sessions: CLICK HERE or visit https://metone.com/training-and-education-opportunities/

Any Additional Questions? Please feel free to contact us with any training-related questions at service.moi@acoem.com or +1-541-471-7111.
